swipeup

swipeup

SwipeUp is the next evolution of a yield-generating contract on the Binance Smart Chain (BSC): You get rewarded in SXP instead of tokens. The token contract employs a static rewards system -15% of every transaction is split in two:

-10% SXP is redistributed to holders
-2% is used to fuel the liquidity pool exchange growth
-3% SXP is allocated to the Buy back / Marketing wallet.

Soon we will make game app for token so you can earn SXP by playing games.

In the next stage, we will create Nft cards and give rewards to the holders.

Simply hold $SwipeUp tokens and get rewarded in SXP on evaery transaction!

With the auto-claim feature, you'll receive SXP automatically in your wallet.
